Hazchem Placarding

Most States and The Northern Territory have now adopted the NOHSC model Dangerous Goods and Storage Regulations. Each State and Territory has their own Dangerous Goods Regulations which also include the same placard signage requirements.

These Regulations are:

- Victoria - Dangerous Goods (Storage and Handling) Regulations 2000. Amended 1 Oct 2005.
- Queensland - Dangerous Goods Safety Management Regulation 2001.
- NSW - Occupational Health and Safety Amendment (Dangerous Goods) Regulation 2005.
- WA - Dangerous Goods Safety (Storage and Handling of Non-explosives) Regulations 2007.
- NT - Northern Territory of Australia Dangerous Goods Regulations 2008.
- TAS - Dangerous Substances (Safe Handling) Regulations 2009.

We recommend that you obtain a copy of your respective Regulations and other publications for further information and guidance.

Placards provide visual warning of the hazards associated with the storage of dangerous goods at a premises. All premises must be placarded if dangerous goods are stored in bulk or in a quantity that exceeds the quantity specified in the column headed "Placarding Quantity" in the Schedule listed in the respective state or territory Regulations.

The following placard signage now applies to all the above States and The Northern Territory.

Outer Warning Placard

A HAZCHEM outer warning sign shall be prominently displayed at all road and rail entrances to the premises.

Size	600 x 150			
	Description	Metal	Poly	Vinyl
1.	Hazchem Outer Warning Placard	PHAZM	PHAZP	PHAZV

Packaged Goods Placards

A placard for packaged goods must be displayed if the quantity of dangerous goods in an area exceeds the quantity specified in column headed "Placarding Quantity" in Schedule 2 of the Regulations.

2. 800 x 200 - Maximum 8 diamonds

3. 600 x 150 - Maximum 4 diamonds

4. 450 x 150 - Maximum 3 diamonds

5. 300 x 150 - Maximum 2 diamonds

Size	600 x 150			
	Description	Metal	Poly	Vinyl
2.	800 x 200 Packaged Goods Placard	PHAZCQ30M	PHAZCQ30P	PHAZCQ30V
3.	600 x 150 Packaged Goods Placard	PHAZC30M	PHAZC30P	PHAZC30V
4.	450 x 150 Packaged Goods Placard	PHAZC31M	PHAZC31P	PHAZC31V
5.	300 x 150 Packaged Goods Placard	PHAZC32M	PHAZC32P	PHAZC32V

The minimum size for diamonds for packaged goods placards size is 100 x 100mm. Dangerous goods diamonds are sold separately. Refer to dangerous goods diamonds table on page 32.

Bulk Storage Placards

A Bulk Storage sign must be displayed on or adjacent to a tank containing a liquid or gas, or an area where bulk solid dangerous goods are stored of a single chemical.

Storage in Bulk is classified as:

- Class 2 gases stored in a container having a capacity greater than 500 litres.
- Chemicals other than Class 2 in liquid or paste in a container of a capacity greater than 250 litres
- In the form of a solid in an undivided quantity greater than 400 kg.

Size	800 x 400			
	Description	Metal	Poly	Vinyl
6.	Bulk Storage Placard	PHAZBTM	PHAZBTP	PHAZBTV

Refer to Edition 7 of the ADG Code for correct chemical names, hazchem code, UN number and Class. Also note that the reverse coded letters are no longer applicable.

C1 Combustible Liquid Placards

These signs are specifically for chemicals classified as C1 Combustible Liquids when stored in bulk and in packages.

These are chemicals which have a flash point above 61°C and no higher than 150°C.

Examples of some chemicals classified as C1 Combustible Liquids are: Distillate (Diesel) and Ethylene Glycol.

A placard for packaged goods must be displayed if the quantity of Combustible Liquids in bulk or packaged goods exceeds the quantity specified in column headed "Placarding Quantity" in Schedule 2 of the Regulations.

Size	900 x 150		
Description	Metal	Poly	Vinyl
1. Combustible Liquid	PHAZCLM	PHAZCLP	PHAZCLV

Size	1000 x 150		
Description - WA Only	Metal	Poly	Vinyl
2. C1 Combustible Liquid	PHAZCL1M	PHAZCL1P	PHAZCL1V

Emergency Information Panels for Vehicles

An Emergency Information Panel shall be displayed on all vehicles transporting dangerous goods in bulk.

If a tank or intermediate bulk container (IBC) has a capacity of not more than 3 cubic metres, an emergency information panel fixed to a tank or IBC may not be less than half size (400x300). Refer to the ADG Code edition 7 for further details.

Size	800 x 600		400 x 300		
	Colourbond Steel	Vinyl	Colourbond Steel	Poly	Vinyl
3. Emergency Information Panel	PTM86M	PTM86V	PTM43M	PTM43P	PTM43V

Unstable Goods Too Dangerous To Transport

This is a new classification of chemicals stored in either bulk or packaged goods.

Chemicals classified as "Too Dangerous To Transport" must be placarded if the quantity exceeds the quantity specified in the column headed "Placarding Quantity" in Schedule 2 of the Regulations.

Size	800 x 400		
Description	Metal	Poly	Vinyl
4. Unstable Goods Bulk Storage Placard	PHAZBTM	PHAZBTP	PHAZBTV

Environmentally Hazardous Substances

Packages containing environmentally hazardous substances must be marked in accordance with the ADG Code Edition 7 for packaged goods and for transport units.

Size	300 x 300		250 x 250	100 x 100
	Metal	Vinyl	Vinyl	Vinyl
5. Environmentally Hazardous Substances	PTMEHM	PTMEHV	P25EH	P10EH

Dangerous Goods Segregation Chart

Within Australian Standards AS/NZS 3833-2007 "The Storage and Handling of Mixed Classes of Dangerous Goods, In Packages and Intermediate Bulk Containers" there are recommendations for minimum separation distances for Stores from protected places. Refer to this standard for further details.

The following table provides a summary of these requirements.

Manifest Cabinet

A manifest is required where a premises is storing and handling dangerous goods in quantities that exceed the "Manifest Quantity" as shown in schedule 2 of the Regulation. Refer to the Regulation for the relevant information required for the manifest document. This information should be kept in a suitable Manifest Cabinet located on the premises in a place where it is readily accessible to the emergency services authority.

Size	500 x 600 x 100
Description	
4. Manifest Cabinet	PHAZCAB

4.

A Manifest cabinet should be installed at the entrance to the property and contain:

1. Site map showing the location of hazardous chemicals and the location of all fire fighting equipment.
2. Copies of Material Safety Data Sheets for all chemicals stored on site.
3. A 24 hour phone number to be used in an emergency.
4. The cabinet should have locking systems compatible to the local Fire Brigade.

Fitted with a 003 Combination Lock.

Material Safety Data Sheet Holders

MSDS documents should be kept in an appropriate location for easy access and reference by company employees.

Pratt Floor Signs

Signs made of high quality floor grade self adhesive vinyl laminated with tough textured protective vinyl cover.

Ensure floors are a smooth surface and cleaned of dirt or grease before applying.

Concrete floors should be sealed before applying signs.

Avoid areas of heavy forklift traffic or turning on signs.

Non Slip Tape

With the ever increasing emphasis on safety in the workplace, Pratt Safety Tred Non Slip Tape will help reduce the number of potential accidents. A heavy duty self adhesive tape suitable for both indoor and outdoor applications.

Excellent adhesion in wet areas makes it ideal for a wide variety of applications where anti slip protection is required.

Made from Silicon Carbide and Aluminiumoxide materials ensuring long wearing performance.

Typical Applications: Hospitals, Industry, Coolrooms, Freezers, Ramps, Stairways, Truck and Bus steps, Ladders, Marine or any area where a slip hazard exists.

Easy to apply on wood, vinyl, concrete and painted surfaces. Ensure floor is dry, dust and oil free before applying.

Pipemarkers should be located adjacent to all Junctions, Valves, Service Applications, Bulkheads, Wall Penetrations and the like at spacing not greater than 8 metres along the service.

An exception will be for uninterrupted lengths of external services, visible along their length, where spacing of identification shall not exceed 50 metres.

Supplementary markers are required to identify a potential hazard involving the contamination of materials for human consumption or whenever a special hazard to operators or maintenance personnel is present within a service. Refer to clause 8 Australian Standard AS 1345-1995

We can manufacture pipemarkers to suit your specific needs whether it is for only one packet or one hundred.

All markers conform with AS1345-1995.

Please contact our Customer Service Department for an obligation free quotation or for assistance with your requirements.
